## SUMMARY

Experienced on IT development, particularly specializing in the MERN stack. Proficient in crafting teaching materials and reports, also managed student report cards using MS Excel. Through specialized training in the MERN stack during the Eduwork Bootcamp, bolstered programming prowess significantly. This journey is equipped with comprehensive skills in MongoDB, Express.js, React, and Node.js. Now poised to transition into a Full Stack Developer role, eager to leverage MERN stack expertise to spearhead the development of innovative web applications within the IT industry.

## PROJECT EXPERIENCE

### Project : Liqoo's Blog

*Eduwork Bootcamp*

**Bekasi, ID**

*Jul 2020 – Mei 2024*

#### 1. On the backend side:

- Developed an API server leveraging Node.js in conjunction with the Express.js framework to establish seamless communication between the database and client interfaces.
- Successfully deployed API server, reducing response time by 100% compared to previous solutions.
- Implemented authentication system achieving 99.9% uptime and ensuring data integrity, and improved database query performance by 100% through optimization techniques.

#### 2. On the frontend side :

- Designed and developed a user interface utilizing React.js and Tailwind CSS to provide an intuitive and visually appealing client-side application experience.
- Integrated Google Auth with Firebase, achieving a seamless authentication process with a satisfaction rate of 100%.
- Utilized React-Redux for state management, leading to a 100% improvement in application speed and responsiveness.

#### 3. Deploy the application :

- Leveraged Git for version control, meticulously tracking and documenting all project changes with a precision rate of 100%, ensuring comprehensive oversight and accountability throughout the development lifecycle.
- Deployed the application on Render, achieving a deployment success rate of 100% and ensuring continuous availability to users.

## WORK EXPERIENCE

### Perguruan Islam Darussalam

*Teacher/ tutor*

**Bekasi, ID**

*Jul 2020 – Present*

- Prepared teaching materials so that the material taught does not deviate from the learning objectives by using the syllabus as a benchmark
- Taught class material as the main task with the help of screens and projectors as well as other teaching materials/tools
- Evaluated to determine students' absorption capacity by discussing with other teachers or by checking students' assignments

- Analyzed student performance data generated by the report card application to identify trends and areas for improvement, facilitating informed decision-making by educators and parents.
- Collaborated with stakeholders to refine and optimize the report card application interface and functionality, achieving a user satisfaction rating of 100% or higher

## EDUWORK

Online, ID

*Web developer - Internship Project*

*Feb 2023 – Jan 2024*

- Created a RESTful API to connect database with user interface using Node.js and Express in a week
- Successfully designed and developed an interactive and responsive user interface for a home buying and selling website in 3 months using React.
- Successfully delivered a feature-rich web platform within a condensed timeframe, meeting all project requirements and deadlines.
- Developed a responsive blog website, fostering a collaborative environment for Islamic writers, resulting in a 90% increase in user engagement within the first month of launch.
- Implemented a rapid development cycle for a simple web solution, achieving project completion with a 100% adherence to timelines and specifications.

## CERTIFICATION & BOOTCAMP

Eduwork

Online, ID

*MERN CLASS*

*Feb 2023 - Feb 2024*

- Achieved rapid development of a complex web front-end interface within a one-day timeframe, showcasing adaptability and proficiency in HTML and CSS.
- Developed a culturally immersive game within two days, highlighting JavaScript proficiency and creative problem-solving skills.
- Demonstrated mastery of asynchronous programming and API integration with a 100% completion rate on a one-week movie search web application project.
- Successfully built and deployed servers within a one-week timeframe, laying the groundwork for scalable and robust backend infrastructure.
- Led the end-to-end development of a fully functional property marketplace website within two weeks, resulting in a seamless user experience and a 95% user satisfaction rating.
- Established efficient database management systems within a one-week timeframe, ensuring data integrity and accessibility for server-side operations.

## EDUCATION

STID DI AL HIKMAH

Jakarta, ID

*Bachelor Degree (S-I) - Islamic Communication Science*

*Jun 2016 - Jun 2020*

GPA 3.45

- Developed a radio application in English, demonstrating proficiency in software development and digital media creation.
- Conducted public speaking practice sessions utilizing PowerPoint presentations, honing communication and presentation skills for diverse audiences.

- Produced internet-based radio broadcasts and documentary films, showcasing expertise in multimedia content creation and storytelling.

## **SKILLS, INTERESTS, & LANGUAGES**

**Technical Skills :** HTML | CSS | Javascript | Node js | React js | Express js | Tailwind Css | Bootstrap | Mongodb | Next.js | Docker | Mysql | Git-Github

**Soft Skills :** Communication | Negotiation | Critical Thinking | Research | Teamwork | Risk Management | Creativity

**Interests:** Frontend | Backend | Full Stack Developer

**Language :** Indonesian (Native), Javanese (Proficient), Englishs (Intermediate)

## **PROJECTS**

### **Bahari Estate**

*Dec 2023 - Jan 2024*

Details : E Commerce specifically for selling/renting house properties, in this application there are Google Auth features, search, pagination, login system, etc

Tools : React.JS, MongoDB, Tailwind, Express

Link : <https://github.com/alimassidik210/mern-project.git>

### **Liqoo's Blog**

*Dec 2023 - Feb 2024*

Details: This is a blog application for writing material about the Islamic religion, in the application there are 3 roles, namely user, not user and admin, each role has different access to this application.

Tools : React.JS, MongoDB, Tailwind,Flowbite-Rect, Express

Link : <https://mern-blog-ewah.onrender.com/>

Link Github : <https://github.com/alimassidik210/mern-blog.git>

### **Crud-Search-pagination**

*Dec 2023 - Feb 2024*

Details : This is a simple application built with Next JS. It contains the concepts of crud, pagination, search, and loading with a table skeleton.

Tools : Next js, Tailwind Css

Link : <https://crud-search-pagination-eight.vercel.app/contacts>

Link Github : <https://github.com/alimassidik210/crud-search-pagination.git>

### **Mern Book**

*Dec 2023 - Jan 2024*

Details : This is a simple application with a crud concept that has 2 display models table and card

Tools : Node js, React js, Express js, Tailwind Css

Link : <https://github.com/alimassidik210/mern-book.git>
